# Cat 6 Small Diameter High-Flex Patch Cords

## APPLICATION

Cat 6 Small Diameter High-Flex Patch Cords, with a compact plug and boot, are designed to be used in 1-Gigabit applications and all frequencies from 1 to 250 MHz. Patch cords offer flexible, high-density patching. Cables support high-speed data applications. They reduce patch cord density in a 24-port patch panel by 38 percent when compared to typical Cat 6 patch cords.

## SPECIFICATION

Patch cords shall meet or exceed electrical transmission performance requirements of links and channels as described in ANSI/TIA-568.2 (Cat 6), ISO/IEC 11801-1 (Class E), and EN 50173-1 (Class E). The patch cords shall be 28 AWG, unshielded, twisted-pair, stranded conductor construction with a standard 8-position modular plug on both ends. Plug contacts shall be plated with minimum of 50 micro inches of gold and rated to 2,500 mating cycles. Patch cords shall have an outer diameter of 0.15 inches (3.8 mm) and shall be available in white, yellow, gray, black, red, green, and blue.
